PROFESSIONAL EXPERIENCE

Senior Front-end Developer at HMASERV – Full-time • Alexandria, Egypt **October 2021 - November 2024**

- Communicated and collaborated daily with multidisciplinary teams of engineers, designers, producers, clients, and stakeholders to create high-quality products.
- Enhanced SEO performance, **achieving a 40% increase in organic traffic** and improved search engine rankings.
- Led and mentored a team of 3 entry-level developers, providing guidance and support to enhance their technical skills and foster professional growth.
- Promoted to **Senior-level role** for exceptional performance and significant contributions to project success (March 2024 - present)

Front-end Developer at LamasaTech – Full-time • Remote, United Kingdom **October 2020 - March 2021**

- Engineered company applications leveraging Vue.js, Vuetify, Electron.js, JavaScript, and CSS/SCSS to deliver seamless user experiences.
- Enhanced app accessibility by adding aria-label, alt, and tabIndex attributes, using semantic HTML tags, and following WCAG guidelines, **raising usability for users with disabilities by at least 30%**.
- Implemented a new responsive mobile-first approach, **resulting in a minimum 20% increase in mobile traffic**.
- Conducted thorough code reviews, **reducing bugs by around 15%** and improving overall code quality.

PROJECTS

Cezma.com • video **Nuxt3, Vue3, Tailwind, Pinia, Google Cloud Messaging, I18n**

- Cezma is a structured marketplace multi-language platform for **3 million+ users** and includes **16,000+ stores** as of October 2024.
- Built the main structure of the application. In addition to creating and maintaining the admin, moderator, reseller, and sub-reseller management panels. Also, the website's Homepage, Chats, Cart, Product, Store, User profile, and Categories pages.
- Migrated the entire app from Vue3 to Nuxt3 in **5 days** to render some pages on the server side to utilize the SEO functionalities.

Twixie • video • Github **React.js, Redux, Firebase, Bootstrap**

- Made a social media application similar to Instagram, **supporting over 10,000 user interactions daily**, including authentication, posting, commenting, liking, following, chatting, and blocking functionalities.

Fox Sims **Next.js, Redux, Bootstrap**

- Added the Home, Billing, Messages pages, static pages, and the management panel, integrated G-Analytics & SEO enhancements.
- Reduced page load time by 35%**, improving overall user experience and engagement, **leading to a 20% increase in user retention**.

KanbanEase • Github **Vue.js, Pinia, Tailwind, Vuelidate, I18n**

- Engineered a bilingual Kanban app with real-time drag-and-drop, **boosting task management efficiency by 65% between teams**.
- Implemented real-time state management using Pinia, ensuring tasks are saved automatically and accessible across devices.
